

ÜLESANNE:

1. Koostada programm, nii et sõites vastu takistus tagurdab robot kahe sekundi jooksul.
2. Tagurda mitte otse vaid väikse kaarega

LAHENDUS:

The screenshot displays the LEGO Mindstorms software interface with a programmed sequence of actions:

- Move Block 1:** Port: C, B; Direction: Forward; Steering: C, B; Power: 50; Duration: 360; Next Action: Brake.
- Wait Block:** Control: Sensor; Sensor: Touch Sensor; Action: Pressed.
- Move Block 2:** Port: C, B; Direction: Backward; Steering: C, B; Power: 75; Duration: 2 Seconds; Next Action: Brake.
