

NODALIDA 2009 workshop:

WordNets and other Lexical Semantic Resources - between Lexical Semantics, Lexicography, Terminology and Formal Ontologies

Half-day workshop held May 14 at Nodalida 2009, Odense, Denmark. The goal of the workshop was to bring together researchers involved in building and integrating lexical semantic resources as well as researchers that are more theoretically interested in investigating the interplay between lexical semantics, lexicography, terminology and formal ontologies.

The workshop organizers received 14 papers for review and each paper was anonymously reviewed by two reviewers of the Programme Committee. Borderline papers with considerable disagreement between reviewers have undergone an additional judgment by a third member of the Programme Committee. Of the 14 papers, 8 were selected for presentation and publication, 4 were rejected, and 2 were withdrawn by the authors.

Workshop organizers

Bolette Sandford Pedersen, University of Copenhagen, Denmark
Anna Braasch, University of Copenhagen, Denmark.
Ruth Vatvedt Fjeld, University of Oslo, Norway
Sanni Nimb, Society for Danish Language and Literature, Denmark.

Programme Committee:

Claudia Kunze, Universität Tübingen, Germany
Helge Dyvik, University of Bergen, Norway
Janne Bondi Johannesen, University of Oslo, Norway
