## Bericht des Zuchtinspektors des Verbandes balt. Anglerniebzüchter für das Jahr 1914.

M. G.! Das eben verfloßene Jahr hat über unsere baltischen Zuchten schwere Prüfungen gebracht, welche in ihrer Wirkung noch nicht abgeschlossen sind und welche wohl ein Kriterium für die Lebenskraft unserer Arbeit bieten dürften.

Die ersten Monate des Jahres verliefen normal; es ließ sich eine rege züchterische Tätigkeit beobachten und die von Ihnen gewählte Kommission brach zum Ankauf von Zuchttieren nach Dänemark und Schleswig auf. Unter Subvention der Regierung wurden 5 Stiere importiert, welche im September hier am Orte verauktioniert worden sind, und außerdem sind noch auf private Bestellung hin 2 Stiere angekauft worden.

Die Dürre, welche der diesjährige Sommer brachte, zerstörte alle Hoffnung auf eine gute Futterernte und ließ die Züchter mit Sorgen in die Zukunft schauen und dazu kam dann plötzlich und unerwartet der Ausbruch des großen Krieges, der immer noch fort dauert und dessen Folgen für unsere baltischen Herden sich noch nicht überblicken lassen. Direkt zwar ist unsere Heimat von der Kriegsfurie verschont geblieben, es lag aber die Gefahr vor, daß unsere Zuchtherden durch Requisitionen schwer geschädigt werden könnten, da war es mit Freuden zu begrüßen, daß der Erlauchte Höchstkommmandierende der Armee auf das von der Landw. Hauptverwaltung befürwortete Gesuch der Oekonomischen Sozietät zu befehlen geruht hat, gekörte Stiere von der Requisition zu befreien. In der Folge ist es auch gelungen in praxi eine Berücksichtigung der Ruhförungen in dem Sinne zu erreichen, daß fürs erste vorwiegend die nicht-gekörten Kühe requiriert worden sind und unsere Zuchtherden uns somit hoffentlich erhalten bleiben werden.

Im Jahre 1914 ist in 125 Herden gekört worden, gegen 132 im Vorjahre und 102 im Jahre 1912. Diesen Rückgang von 7 Herden möchte ich nicht dem Kriege zur Last legen, da eine Abmeldung von Körungen des Krieges

wegen nur in einem einzigen Falle vorgekommen ist, sondern vielmehr der Dürre und Mißernte an Futter zu schreiben, welche manche Herren veranlaßt hat, die Körung um ein Jahr aufzuschieben.

Im Ganzen sind 1914 gekört worden 2037 Haupt, gegen 2648 im Vorjahre und 2154 im Jahre 1912. Nach Geschlechtern gefondert wurden gekört 135 Stiere und 1902 Kühe gegen 160 Stiere und 2488 Kühe im Vorjahre.

Von diesen gekörten Tieren stammten:

Die eingeklammerten Zahlen beziehen sich auf das Jahr 1913.

Indem ich hiermit meinen Bericht schließe spreche ich die Hoffnung aus, daß unser Verband nach einem Jahr die Krisis, in welcher er sich eben befindet, glücklich wird überstanden haben.

## Bericht des Kontrollinspektors der bei der Kaiserlichen Livländischen Gemeinnützigen und Ökonomischen Sozietät bestehenden Rindviehzuchtverbände pro 1914.

M. G.! Das verflossene Jahr begann für das Kontrollwesen unter günstigen Auspizien; wenn es auch nicht gelungen war auf den letzten Generalversammlungen der Rindviehzuchtverbände im Januar vorigen Jahres die obligatorische Milchleistungskontrolle und die Verwertung ihrer Resultate für die Körungen schon im Berichtsjahre einzuführen, so waren die dahin zielenden Bestrebungen doch durchaus nicht resultatlos. Die Generalversammlungen erkannten im Prinzip die Notwendigkeit der obligatorischen Leistungskontrolle an, wenn auch der Zeitpunkt ihrer Einführung noch nicht fixiert wurde\*). Gleichsam als Vermittlungsorschlag wurde gemäß dem Antrage des Zuchtinspektors Professor Dr. Stegmann in beiden Verbänden Delegierte einer gemeinsamen Kommission gewählt, welche die Einführung einer zweiten Körung und eines getrennten Elite-Stammbuches beraten und das Projekt zur Annahme in den nächsten, noch im laufenden Jahre einzuberufenden Generalversammlungen vorbereiten sollte. Die Aufnahme in die Elite-Stammbücher sollte nicht obligatorisch sein. Diese Kommission tagte am 2. Februar hier selbst. Es lagen zwei Projekte über die Eröffnung von Elite-Stammbüchern vor, das eine von den Herren Landrat von Blanckenhagen-Mlasch und Professor Dr. Stegmann, das andere von Herrn von Berg-Schloß Randen. Das erste Projekt befürwortete die Eröffnung eines Elite-Stammbuches und einer zweiten Körung, wobei unter Verschärfung der Anforderungen an das Exterieur zugleich die relative Leistung mit ausschlaggebend sein sollte. Das zweite Projekt wünschte an dem bisherigen Körungsmodus gar nichts zu ändern oder neu hinzuzufügen, jedoch in Zukunft einen Anhang zu den Stammbüchern herauszugeben, in welchen Kühe mit bestimmten guten absoluten Leistungen (jedoch ohne Angabe der erreichten Höhe der Leistung) verzeichnet werden sollten. Des weiteren sollten bei Auktionen und Prämierungen nur solche Leistungen veröffentlicht und eventuell berücksichtigt werden, die durch die offizielle Kontrolle nachgewiesen waren. Nachdem die Berücksichtigung der relativen Leistung als noch zu wenig genau festgestellt, von der Majorität der Kommissionsglieder verworfen worden war, fand leider in der Frage der Elite-Stammbücher keine Einigung der beiden Verbände statt; es sollte vielmehr mit geringfügigen Abänderungen der Antrag der Herren Landrat von Blanckenhagen und Pro-

fessor Dr. Stegmann dem „Verbande Baltischer Angler-viehzüchter“, der Antrag des Herrn von Berg aber dem „Verbande Livländischer Holländer-Friesenviehzüchter“ zur Annahme empfohlen werden.

Da der Herr Landrat von Blanckenhagen-Mlasch seinen Antrag nicht persönlich in der Kommissionsitzung vertreten hatte, sich mit der Abänderung, daß nur die absolute Leistung bei der Körung für das Elite-Stammbuch berücksichtigt werden sollte, durchaus nicht einverstanden erklären wollte; da auch der ältere Kontrollinspektor wenig mit diesem Projekte sympathisierte, so arbeiteten Herr von Blanckenhagen und der Berichterstatter ein neues Projekt aus, wonach vom Jahre 1920 ab im Angler-Verbande eine zweimalige Körung obligatorisch gemacht werden sollte. Bei der zweiten (definitiven) Körung sollte neben den verschärften Anforderungen an das Exterieur eine bestimmte relative Leistung maßgebend sein. Dieser Antrag wurde dem Präsidium des B. B. A. eingereicht und sollte auf der nächsten Generalversammlung verhandelt werden. Eine Kopie wurde Herrn von Loevis-Alt-Brangelsklof, einem der Glieder der Februar-Kommission, eingesandt mit der Bitte eine ähnliche Aktion im B. L. G.-F. anzuregen, was um so mehr geboten schien, da im Kartell-Verbande die Nachbargouvernements Kurland, Estland und wohl auch Kowno die obligatorische Kontrolle bereits eingeführt hatten, worüber auch Herr Zuchtinspektor Hoffmann in der „Baltischen Wochenschrift“ berichtet.\*)

In der letzten Jahresversammlung war beschlossen worden nur eine solche Kontrolle anzuerkennen, die zweimal monatlich erfolgte, ferner sollte die sogenannte private Kontrolle nur dann anerkannt werden, falls die Verkehrslage des betreffenden Gutes die Gründung eines regulären Kontrollvereins ausschloß; außerdem sollte die Oberleitung mit aller Kraft an die Begründung eines Netzes von Kontrollgruppen über das ganze Land gehen. Diese Beschlüsse bedingten eine Umorganisation und Neugründung vieler Kontrollgruppen; der vermehrten Arbeit wegen sollte dem älteren Kontrollinspektor noch ein zweiter Gehilfe beigegeben werden. Im März fand deswegen eine Ausschuß-Sitzung in Riga statt, auf welcher Herr Otto Kranz zum zweiten jüngeren Kontrollinspektor gewählt wurde; am 1. Juni hat Herr Kranz sein Amt angetreten

Schon bis zum März hatte es sich herausgestellt, daß

\*) conf. Protokolle — B. B. 1914, Nr. 13 u. Nr. 15.

\*) B. B. 1914 Nr. 21.

der Durchführung der zweimal im Monat zu erfolgenden Kontrolle erhebliche Schwierigkeiten entgegenständen; viele Herdenbesitzer erklärten: der erhöhten Kosten wegen lieber völlig auf die Kontrolle verzichten zu wollen, als noch mehr Ausgaben zu tragen. Ein Zwang, durch obligatorische Kontrolle etwa, konnte nicht ausgeübt werden und so mußte der Ausschuss soweit nachgeben, daß die zweimal monatliche Kontrolle nur für solche Herden gefordert wurde, die ihre Tiere in die zukünftigen Elite-Stammbücher aufnehmen lassen wollten. Betreffend die einzelnen Fälle der privaten Kontrolle sollten bis zum 1. Juni Daten und Gesuche abgewartet und hierauf diese Angelegenheit in der nächsten Ausschusssitzung entschieden werden.

Vom Vorsitzenden der „Abteilung für Milchkontrolle“, Herrn von Anrep-Lauenhof, der zugleich Vizepräsident des B. B. A. ist, wurde an alle Mitglieder der beiden Zuchtverbände ein Rundschreiben gerichtet, in welchem auf die Bedeutung der Milchkontrolle hingewiesen und zur Beteiligung aufgefordert wurde.

Alle diese Maßnahmen konnten auf die Entwicklung des Kontrollwesens nicht ohne Einfluß bleiben und es stand zu hoffen, daß zu den schon neu begründeten Gruppen sich zum Herbst noch eine größere Zahl hinzufinden würde. Diesen Hoffnungen machte der im Juli losbrechende Kriegssturm ein jähes Ende. Die sogleich einsetzende Geldknappheit nötigte einen jeden zur größten Sparsamkeit, von irgend welchen neuen Unternehmungen konnte nicht mehr die Rede sein; ja in Kurland wurden im Kontrollverein, wie ich hörte in Folge Beamten- und Geldmangels eine Anzahl von Gruppen alsbald geschlossen.

Zu den Kriegsnöten kam die furchtbare Dürre und ich möchte annehmen, daß sie in Livland dem Kontrollwesen bisher mehr geschadet hat als der Krieg. Mit ganz geringen Ausnahmen erlebten alle Güter eine totale Mißernte an Sommerforn und speziell an Futterstroh, dabei war die Klee- und Heuernte zwar qualitativ recht gut, quantitativ aber im Durchschnitt wohl nicht über Mittel ausgefallen. Als weitere erschwerende Momente kamen das Stocken des Güterverkehrs auf den Eisenbahnen und die Einstellung des Kronbrandwein-An- und Verkaufes hinzu. Viele Herdenbesitzer sagten sich scheinbar mit vollem Recht und sicher nicht ohne eine gewisse Berechtigung, was wollen wir kontrollieren lassen, wo wir unser Vieh nicht einmal vor dem Hungern bewahren können? Die Fleischpreise fielen rapid und vielfach ist, vornehmlich allerdings von Kleingrundbesitzern, das Vieh verschleudert worden.

W. S.! Wenn unsere livländischen Zuchtherden all diese Nöte bisher noch verhältnismäßig gut überstanden haben, so ist das in erster Linie der Standhaftigkeit und Besonnenheit ihrer Besitzer zu verdanken, dann aber auch dem Umstande, daß Futterkuchen sowie auch Kleien (diese weniger) in Folge der Unmöglichkeit des Exportes sehr billig wurden und daß die Eisenbahnverwaltung es ziemlich schnell fertig brachte den Frachtverkehr, wenn auch in beschränktem Maße wieder aufzunehmen. Unserem Kontrollwesen kam endlich zu Gute, daß das Departement für Landwirtschaft einen größeren Teil der pro 1914 zugesagten Subsidie auszahlte. In der Ausschusssitzung im September, wo über die Verteilung der Subsidie beraten wurde, lautete dann auch die Parole für die Zukunft: „Aussharren!“

Alle regulären Kontrollgruppen, die weiter arbeiten wollten, erhielten einen gleichen Anteil aus der verfügbaren

Summe der Subsidie. Dem Aussharren sowohl des Ausschusses als auch der Mitglieder ist es denn auch zu verdanken, daß unsere Kontrollabteilung zum Jahreschluß noch verhältnismäßig günstig abschneidet. Am Schluß des Jahres 1913 gehörten zur „Abteilung“ 24 reguläre und 7 Gruppen mit Kontrolle durch eigenes Personal, in Summa 168 Herden mit ca 15 000 Kühen; 1914 sind es 25 reguläre Gruppen und dieselben 7 mit eigener Kontrolle, in Summa 165 Herden mit ca 13 000 Kühen, der Bestand der Herden ist also verringert worden. Aufgelöst hat sich nur eine Gruppe, neubegründet worden sind zwei. Von den fünf Gruppen im Bezirk des „Livländischen Vereins zur Förderung der Landwirtschaft und des Gewerbesleißes“, welche ich in meinem vorigen Bericht besonders erwähnen zu müssen glaubte, hat sich die eine aufgelöst, aus den übrigen sind eine Reihe Herden ausgeschieden und sie haben sich anders organisiert, nun passen sie sich vollständig der Abteilung an, was durchaus als ein Vorteil zu betrachten ist.

In den 25 regulären Gruppen wurden aus mehreren die schwedischen Assistenten zum Kriegsdienst in ihre Heimat berufen, zwei andere verließen aus persönlichen Gründen ihren Dienst und das Land, ein Assistent endlich mußte die Provinz verlassen. Zu den meisten Fällen ist es bisher immer, wenn auch unter Schwierigkeiten und mit Unterbrechungen, gelungen die vakanten Posten wieder zu besetzen; in zwei Fällen werden zeitweilig je zwei Vereine von einem Assistenten bedient und nur in einem Fall ist ein Verein seit dem September ohne Beamten, doch steht zu hoffen, daß wenn nicht neue Hindernisse austauschen auch dieser Verein in kürzester Frist seine Tätigkeit wieder aufnehmen wird.

Ich möchte nun noch etwas näher auf die Zusammensetzung und den Bestand der Kontrollgruppen eingehen. Die betr. Durchschnittszahlen waren:

Für die 25 regulären Gruppen:

6 Herden mit 485 Kühen, 18 Stieren und 237 Stück Jungvieh oder pro Herde 80—81 Kühe, 3 Stiere und 37—40 Stück Jungvieh.

Für alle 32 Gruppen:

5 Herden mit 409 Kühen, 15 Stiere und 203 Stück Jungvieh oder pro Herde 79 Kühe, 3 Stiere und 39 bis 40 Stück Jungvieh.

Die Kontrolle erfolgte in 12 von den 25 Fällen zweimal monatlich und nirgends seltener als alle 3 Wochen. In den 7 Gruppen erfolgte die Kontrolle zweimal im Monat.

Die Zugehörigkeit der Herden zu den Verbänden war folgende:

|                          | In den regulären Gruppen: | In allen Gruppen:    |
|--------------------------|---------------------------|----------------------|
| B. B. A.                 | 79 Herden = 52.3 %        | 85 Herden = 51.5 %   |
| B. L. S.-F.              | 42 „ = 27.8 %             | 50 „ = 30.3 %        |
| keinem Verbandsangehörig | 27 „ = 17.9 %             | 27 „ = 16.4 %        |
| mehrere Rassen haltend   | 3 „ = 2.0 %               | 3 „ = 1.8 %          |
| Summa                    | 151 Herden = 100.0 %      | 165 Herden = 100.0 % |

Die betr. Durchschnittszahlen des Bestandes der Herden sind:

B. B. A. alle Gruppen:

80—81 Kühe, 3 Stiere, 41—42 Stück Jungvieh.

B. B. A. die regulären Gruppen:  
82 Kühe, 3 Stiere, 42 Stück Jungvieh.

B. L. H.-F. alle Gruppen:  
78—79 Kühe, 2—3 Stiere, 39—40 Stück Jungvieh.

B. L. H.-F. die regulären Gruppen:  
80 Kühe, 2—3 Stiere, 38 Stück Jungvieh.

Keinem Verbands angehörig, alle Gruppen resp. die regulären Gruppen:

65 Kühe, 2 Stiere, 27 Stück Jungvieh.

Die Herden, welche mehrere Rassen halten sind nicht mit inbegriffen, auch habe ich die Herden nicht mit ihrem Bestande an Rassevieh, sondern nur nach dem faktischen Viehbestand und der Zugehörigkeit zu dem betr. Verbands gezählt; daher ergibt sich auch eine Differenz mit der Statistik der „Rais. Livl. Gemeinn. u. Dt. Sozietät“. <sup>1)</sup> Für den Herbst 1914 bringt diese folgende Zahlen für Livland estl. Teil:

B. B. A. 153 Herden, im Durchschnitt:  
43 geförte Kühe, 26 ungeförte = in Summa 69, 2 geförte Stiere, 2—3 ungeförte, 40—41 Stück Jungvieh.

B. L. H.-F. 88 Herden, im Durchschnitt:  
46—47 geförte Kühe, 26 ungeförte = in Summa 72, 2 geförte Stiere, 1—2 ungeförte und 48 Stück Jungvieh.

Interessant ist es nun endlich zu erfahren in wievielen Herden kontrolliert wird und es ergibt sich auf Grund der in genannter Statistik angeführten und von mir etwas korrigierten Daten (da einige wenige Güter in Süd-Livland nicht den richtigen Kreisen zugeteilt waren):

Außerdem gehört zum Bernauer Kreise noch eine A. B.-Herde, welche im Verzeichnis zu Estland gerechnet ist und auch dem Estländischen Kontrollverbande angehört.

Die Zahl der kontrollierten Herden stimmt nicht ganz genau mit meinen obigen Angaben überein, weil in der Statistik einige Zuchtstätten, die beide Rassen halten, 2 Nummern erhalten haben, während andererseits zuweilen zwei Zuchtstätten, die in einherrigem Besitz sind und nur einem Verbands angehören, unter einer Nummer figurieren.

Diese Tabelle zeigt nun deutlich, daß die größere Hälfte der Verbandsherden in Livland unter Kontrolle gestanden hat. Einer Einfügung der Leistungskontrolle in unser Körwesen scheinen daher nicht mehr unüberwindliche Schwierigkeiten entgegen zu stehen.

Der Krieg hat die Herausgabe des Jahresberichtes pro 1912/13 stark verzögert; ich hatte denselben bereits Mitte Juli vollständig druckfertig gemacht, wagte aber nicht ihn bei Ausbruch des Krieges zum Druck zu geben und wartete erst eine nochmalige spezielle Anordnung des Herrn Präsidenten der „Ökonomischen Sozietät“ ab. Dann ging auch das Drucken in einer kleinen Druckerei in Wenden langsam vor sich, da der Setzer sich offenbar erst an diese ungewohnte Arbeit gewöhnen mußte; auch der zweite Satz in russischer Sprache machte Schwierigkeiten, da nicht, wie ich geglaubt hatte, die Zahlentabellen einfach mit einem neuen russischen Kopf versehen werden konnten. So ist denn der Bericht statt im September erst jetzt erschienen und doch war es vielleicht gut so, da ich die ganze Arbeit ständig unter Augen gehabt habe und jetzt bei Berücksichtigung der Druckfehlerberichtigung es wohl in dem großen Zahlenmaterial keine Fehler mehr geben dürfte, so daß es volle Geltung beanspruchen kann.

Für einige Kontrollgruppen liegen nun Daten für drei Jahre vor, da auch schon pr. 1913/14 eine Anzahl Berichte eingegangen sind. Ich greife die Gruppe Nr. 5 heraus. Die Durchschnittszahlen sind: (Siehe die Tabelle 2 auf Seite 4.)

Diese Zahlen zeigen aufs Neue die wirtschaftliche Bedeutung des Kontrollwesens. Sowohl im gesamten Verein als auch in den beiden Herden ist der Milchertrag im Laufe dieser Jahre um 700 resp. 800 resp. 900 Pfd. gesteigert worden; die Steigerung ist oornehmlich dem 2. Jahre zu verdanken. Der auffallend niedrige Fettprozent des ersten Jahres ist wohl der besonderen Beschaffenheit des Raufutters zuzuschreiben; in der schlechtesten Herde, wo die Differenz am größten ist, vielleicht auch der ungenügenden Fütterung überhaupt. Das erstere läßt sich nachträglich natürlich nicht feststellen, nur ist es auffällig wie gering in allen drei Fällen die Schwankungen vom zweiten zum dritten Jahre sind. Jedenfalls hat sich in dieser Gruppe die Kontrolle bisher glänzend bezahlt gemacht, denn wir sind durchaus berechtigt anzunehmen, daß auch die Futtererwertung im ersten Jahre bei den geringen Milcherträgen eine viel schlechtere war als später.

Den Wert des Kontrollwesens sehe ich aber weniger in diesen wirtschaftlichen Erfolgen, die vielleicht auch auf anderen Wegen, wenn auch nicht so prägnant und schnell, erreicht werden könnten, als vielmehr in seiner Bedeutung für die Hochzucht. Ich habe dieses schon öfter angeführt,

ist daher nicht mit unter die kontrollierten gezählt, obwohl beide Rassen kontrolliert werden (jedoch nur an einem Ort). In einer anderen Zuchtstätte werden ebenfalls beide Rassen gehalten und kontrolliert.

5) Der Besitzer einer Zuchtstätte, die auch kontrolliert wird, war Mitglied beider Verbände, doch hat er seine Holländer-Herde verkauft, daher ist diese nicht mitgezählt worden.

1) Труды Импер. Лифл. Общ. и Экон. Общества 1914 — 2. Наши племенные разсадники породистого рогатого скота.

2) In einer Zuchtstätte werden beide Rassen gehalten, die Zuchtstätte gehörte dem Kurländischen Milchkontrollverein an.

3) In einer Zuchtstätte werden beide Rassen gehalten, doch wird nur eine kontrolliert.

4) In 2 Zuchtstätten, einem Besitzer gehörig, werden beide Rassen gehalten, doch steht an einer Stelle nur Jungvieh, diese Stätte

Für das Jahr 1911/12 erfolgte die Berechnung des Futters in Geldwert, daher ist diese nicht mit zum Vergleich zu verwenden.

so auch in meinem gedruckten Jahresbericht pro 1912/13. \*) Ich will daher nur den Schlusssatz hier noch einmal anführen: „Der Zweck jeder Viehzucht aber ist allendlich doch nur die Erhaltung und Steigerung bestimmter Nutzungseigenschaften!“

Die Eigenschaft der Milchergiebigkeit unserer Kühe aber können wir nur durch langdauernde Leistungskontrolle unter Berücksichtigung der Vererbung gründlich kennen lernen. Die Zeit ist auch für uns nicht mehr fern, ja sie ist vielleicht schon gekommen, wo wir mit dem bisherigen System der Beurteilung allein nach dem Exterieur und der Reinblütigkeit werden brechen müssen.

Ist es aber gestattet mit einem Ausblick auf die Zukunft zu schließen, so möchte ich die feste Hoffnung aussprechen, daß die großen Opfer, welche unsere Züchter in dem verflochtenen schweren Jahre für die Erhaltung ihrer Herden gebracht haben und die sie vielleicht auch noch in diesem Jahre werden bringen müssen, nicht vergebens sein

werden. Ihnen winkt die Aussicht nun wirklich der Lieferant von Zuchtvieh für einen nicht unbedeutenden Teil unseres großen Reiches zu werden, da kaum daran gezweifelt werden darf, daß wir uns auch hierin vom Auslande emanzipieren werden. Um aber dieses erstrebenswerte Ziel wirklich zu erreichen, ist es notwendig, unsere Zuchten in jeder Beziehung auf der Höhe zu erhalten; eine nicht unwesentliche Bedeutung hat dabei das Milchkontrollwesen, das auch in vielen anderen Reichsteilen, die Wertschätzung genießt, welche es verdient.

Die zielbewusste Haltung des größten Teiles unserer Züchter in schwerer Zeit bei Geldknappheit und Futtermangel rechtfertigt wohl meine Hoffnung, daß sie auch das Kontrollwesen, eingedenk seiner Wichtigkeit in der Zukunft, trotz mancher Opfer nicht fallen lassen werden.

So wünsche ich denn allen unseren Züchtern den baldigen Lohn für die Mühen und Sorgen des verflochtenen Jahres.

# Protokoll der Generalversammlung des Verbandes Baltischer Anglerviehzüchter.

Jurjew, den 20. Januar 1915

im Lokale der Buchstelle der Oekonomischen Sozietät.

Anwesend: 22 Mitglieder, der ältere und der jüngere Zuchtinspektor und der ältere Kontrollinspektor.

Das Präsidium führt der Vizepräsident des Verbandes, Herr R. von Anrep-Lauenhof. Vom Komitee sind außerdem anwesend die Herren: dim. Landrat E. von Dettingen-Jensel, Präsident der Oekonomischen Sozietät und des Verbandes. Herr G. von Rathlef-Tammist, Herr G. von Samson-Himmeltjerna-Frenhof, Herr G. Bose-Kioma.

Die Tagesordnung lautet:

1. Jahresbericht und Bericht der Rassenrevidenten.
2. Budget 1915.
3. Wahlen.
4. Antrag des Zuchtinspektors die Körbezirke betr.
5. Antrag von Blandenhagen und Heerwagen Körung nach Leistung betr.
6. Bericht der Kommission fürs 2. Stammbuch.
7. Angelegenheiten der Milchkontrolle.
8. Aufnahme neuer Mitglieder.
9. Vorschläge, betr. Erhaltung des Verkaufs-Stalles und Zuchtvieh-Depots in Kallenhof.

Der Herr Vorsitzende eröffnet die Versammlung und erteilt das Wort zum ersten Punkt der Tagesordnung dem Herrn Zuchtinspektor Stegmann.

ad 1. Der Herr Zuchtinspektor verliest seinen Bericht. Hieraus verliest der Protokollführer den Rassenbericht pro 1914, aus welchem hervorgeht, daß das Jahr mit einem Saldo von 295 Rbl. und 03 Kop. abschließt, um welchen Betrag sich auch das Vermögen des Verbandes vergrößert hat, welches nunmehr 6537 Rubel und 79 Kopfen beträgt, außer dem angesammelten Ausstellungsfond von 1520 Rubeln. Der Bericht wird von der Versammlung genehmigt und dem Kassaführer Decharge erteilt.

Vor Beratung über das Budget wird Punkt 9 der Tagesordnung erledigt.

ad 9. Die Gemeinnützige und Landw. Gesellschaft für Süd-Livland, welcher Kallenhof gehört, hat nicht mehr die Möglichkeit den Zucht- und Verkaufs-Stall in der bisherigen Form und mit dem bisherigen Beamten-Stat zu erhalten; da beides im Interesse der Zuchtverbände liegt, so haben die vereinigten Komitees des V. B. A. und V. L. S.-F. zu dieser Frage Stellung genommen. Der Herr Protokollführer verliest den betreffenden Beschluß des Komitees beider Rindviehzuchtverbände, er lautet:

„Nach eingehender Debatte über diesen Gegenstand wird einstimmig beschlossen den Zuchtverbänden vorzuschlagen: zur Erhaltung des Zuchtvieh-Depots, selbst be-

deutendere Opfer zu bringen, jedoch soll das Depot von der Versuchswirtschaft Kallenhof pekuniär vollkommen unabhängig sein. Ferner werden die beiden Herren Vizepräsidenten gebeten noch vor den Generalversammlungen sich mit den hier fast vollzählig anwesenden Konseil-Gliedern der Süd-Livländischen Gesellschaft zu beraten und positive Vorschläge auszuarbeiten.“

Die erwähnten Beratungen haben stattgefunden, doch ist es aus naheliegenden Gründen in der Kürze der Zeit nicht möglich gewesen ein detailliertes Projekt auszuarbeiten. In der Debatte über diesen Gegenstand spricht sich die Generalversammlung fast einstimmig dahin aus, in Anbetracht der Wichtigkeit des Zuchtviehhandels für die Zuchten pekuniäre Opfer nicht zu scheuen, um das Depot zu halten und zwar mit dem bisherigen Leiter an der Spitze, da auch die Persönlichkeit desselben eine Rolle bei der Absatzmöglichkeit spiele. Der Präsident der Gesellschaft für Süd-Livland — Herr E. von Blandenhagen-Klingenberg — ist derselben Ansicht, betont aber, daß der Vorstand der Gesellschaft entschlossen ist, falls wider Erwarten die Verhandlungen mit den Verbänden zu keinem Resultat führen, den Verkaufs-Stall auf eigene Rechnung und Gefahr, wenn auch mit reduziertem Beamtenbestande, fortzuführen. Nach längerer lebhafter Debatte wird auf Vorschlag des Herrn Präsidenten der Oekonomischen Sozietät der Beschluß gefaßt: Das Praesidium des Verbandes zu ersuchen die Verhandlungen mit dem Konseil der Süd-Livländischen Gesellschaft in der skizzierten Weise (Anstellung des bisherigen Leiters und pekuniäre Trennung von der Versuchswirtschaft) zum Abschluß zu bringen, in das Budget aber zur Deckung der hieraus erwachsenden Ausgaben 1000 Rbl. einzustellen.

ad 2. Nach Einstellung der obigen Posten und einiger nicht wesentlicher Veränderungen wird das vom Komitee proponierte Budget pro 1915 angenommen, es lautet:
